- Complete the registration form, moving from box to box.
- Click with your mouse pointer inside the first box & type in your first name.
- To move from one box to the next you can use the **Tab** key on your keyboard (top left next to Q key), or you can use your mouse pointer to click in each box in turn.

- When you come to a box with a little arrow at the side, click on it & a menu of choices appears.
- Choose one option by clicking on it once.
- That option is then entered in the box.

- When choosing your **Yahoo ID** chose something that you will be able to remember, as you will need to use it to get access to your e-mail in future. Make it personal to you so your friends will remember it too.
- Your **password** should be at least 6 characters long. It is advisable to use a combination of letters & numbers, but try to make it memorable too, as you will need to use it each time you log into your e-mail account. When typing in your password it will appear as a series of **\*\*\*\*\*** for security reasons, & you will be asked to retype it to ensure you have got it right.
- Select a security question & provide an answer for it, so that Yahoo can remind you what your password is, if you forget it.
- If you don't want **junk mail** from Yahoo, don't tick the '**Special Offers**' box.

- You are asked to '**Verify Your Registration**' to ensure you are a real person & not another computer, by copying the code given into the box above it:

**Verify Your Registration**

\* Enter the code shown:  [More info](#)

This helps Yahoo! prevent automated registrations.
